ABOUT ELWORLD ORGANIC

Established in 2016, Elworld Agro & Organic Foods Pvt. Ltd. Is India's pioneering and premium organic food brands which aims to redefine the way of healthy living by providing authentic organic foods such as Pulses, Beans, Spices, Rice, Cereals and Sweetners etc.

We are a subsidiary of 32 year old **ELCOMPONICS GROUP** and we specialize in producing certified organic food products and we aim to serve you with the best quality. So to achieve this, our Chairman and Managing Director (CMD) **Mr. S.N. Dwivedi** goes an extra mile and Elworld Organic has join hands with 2000+ farmers to help them produce pure organic foods while covering approximately 4500 hectares of land area.

We are an enthusiastic team with a vision to provide you with some of the best nature's healthy treasures.

MD's PASSION & VISION

Mr. Dwivedi, an entrepreneur and impassioned farmer by choice is committed to provide Healthy Living to mankind. He developed his passion towards Organic Farming and its produce. His dream is to make organic food available to every family's kitchen in the world. Initially Mr. Dwivedi thought to grow enough organic food for near & dear ones, but subsequently understood the power of organic food. His larger commitment to organic farming and Organic Farmers eventually led to the birth of Elworld Organic in 2016.

Elworld Organic has its organic farms in Village Kashishon, Khair Tehsil, Aligarh district of Uttar Pradesh (UP). Today, the company has joined hands with more than 2000+ organic farmers—part of the Elgrow Farmers Association—hailing from almost entire part of the nation.

S.N. Dwivedi Organic Farming

Elworld follows a sustainable ecosystem and complete organic procedure for its entire produce. On its farms, Elworld strictly uses natural plant growth boosters and herbal pesticides. On the ecosystem we have developed bio gas which runs by using the cow dung from our own cow farms. The one extract out of this is gas which is being used by the caretaker of the farm to make their own food as well as Cow's feed. The other extract named as sludge is being further separated by a separator machine to make Vermi Compost in both water and solid form. Water part which is highly nutritional is being used as sprinklers on plants to prevent from diseases and the solid compost then later added with an innovative Elworld formula to be used as natural pesticide on the crops. Not just on the fields but off-farm also, Mr. Dwivedi and his team promulgate clean and healthy living. Company has established a solar-run organic food canteen at corporate office in Noida (UP), which caters organic meals to each employee at the group.

Rice is naturally rich in key nutrients like Protein, Fiber and Vitamins. But, Organic Rice is better than the conventional rice in many ways. Organic rice is known to improve heart health and strengthen the bones. As an added bonus, organic rice also helps to lose weight! Eating organic rice offers additional health benefits. When compared with conventionally grown food crops, organic foods contain less pesticides and food additives, minimizing your exposure to harmful chemicals. Whole grain rice includes the outer husk of the rice and retains the maximum fiber content.

In addition to the potential health benefits of organic rice products, many businesses and consumers choose organically grown foods, including organic brown rice, for environmental reasons. Organic farming practices benefit the environment by reducing agricultural chemicals, conserving water, and reducing carbon footprint.

Organic Millets & Seeds

Organic millet is a wonderfully tasty grain. Also known as Proso Millet, it is rich in B vitamins, especially niacin, B6 and folic acid, calcium, iron, potassium, magnesium, and zinc.

Today, Millet is the world's sixth most important grain crop, with India producing the bulk of the world's supply and a large portion being grown in China and several African countries as well. The seed of an annual grass and a common ingredient in birdseed when unhulled, Millet requires the least water of any grain crop, making it resistant to hot, harsh growing conditions.

Recently, with the growing interest in healthy eating, Millet has become better known as a tasty alternative to rice. Millet lends itself to pilafs, breakfast cereal, breads, soups and stews.

Organic cereals have provided unlimited health benefits as a staple food in our diet. Cereals are rich in complex carbohydrates that provide you with ample energy and help to prevent cancer, constipation, colon disorders, and high blood sugar levels. They also enrich your overall health with abundant proteins, fats, lipids, minerals, vitamins, and enzymes. Cereals are enriched with niacin, iron, riboflavin, and thiamine, and most cereals have abundant fiber contents, especially barley, oat, and wheat. Cereals also have soluble bran that aids in lowering blood cholesterol levels and keeping heart diseases at bay.

Organic flour is milled from pesticide-free grain and grown in soil only fertilized by natural substances. The flour is not artificially processed or chemically ripened. Flour contains a high proportion of starches, which are a subset of complex carbohydrates also known as polysaccharides. Organic flour must be certified to meet the standards of organic produce by meeting the stipulations of third party organizations that have a certain set of standards. Thus, organic flour, like all processed organic foods, must be free of artificial food additives as well as being grown without synthetic pesticides.

Organic Spices & Herbs

Organic spices have a lot more to offer than just taste and flavour. For years they have helped us boost our metabolism, improve the immunity and fight different kinds of diseases. They are safe to use as no pesticides and chemicals are used during their cultivation. One of the main reasons to switch to organic spices is the fact that it does not use any synthetic chemicals and pesticides for the cultivation process at all, and instead substitutes it with organic manure and bio fertilizers. Herbs and spices have always been an integral part of our kitchen. Every dish we cook requires certain spices without which the recipe cannot be executed.

Natural sweeteners are generally safe. But there's no health advantage to consuming any particular type of added sugar. Consuming too much added sugar, even natural sweeteners, can lead to health problems, such as tooth decay, weight gain, poor nutrition and increased triglycerides. The worst sweeteners are artificial sweeteners, such as sucralose, saccharin, and aspartame. These sweeteners are manufactured in a lab, meaning they're not found in nature.

Organic Oil & Ghee
